8086 Microprocessor Lab

EMU8086 Program Screenshots

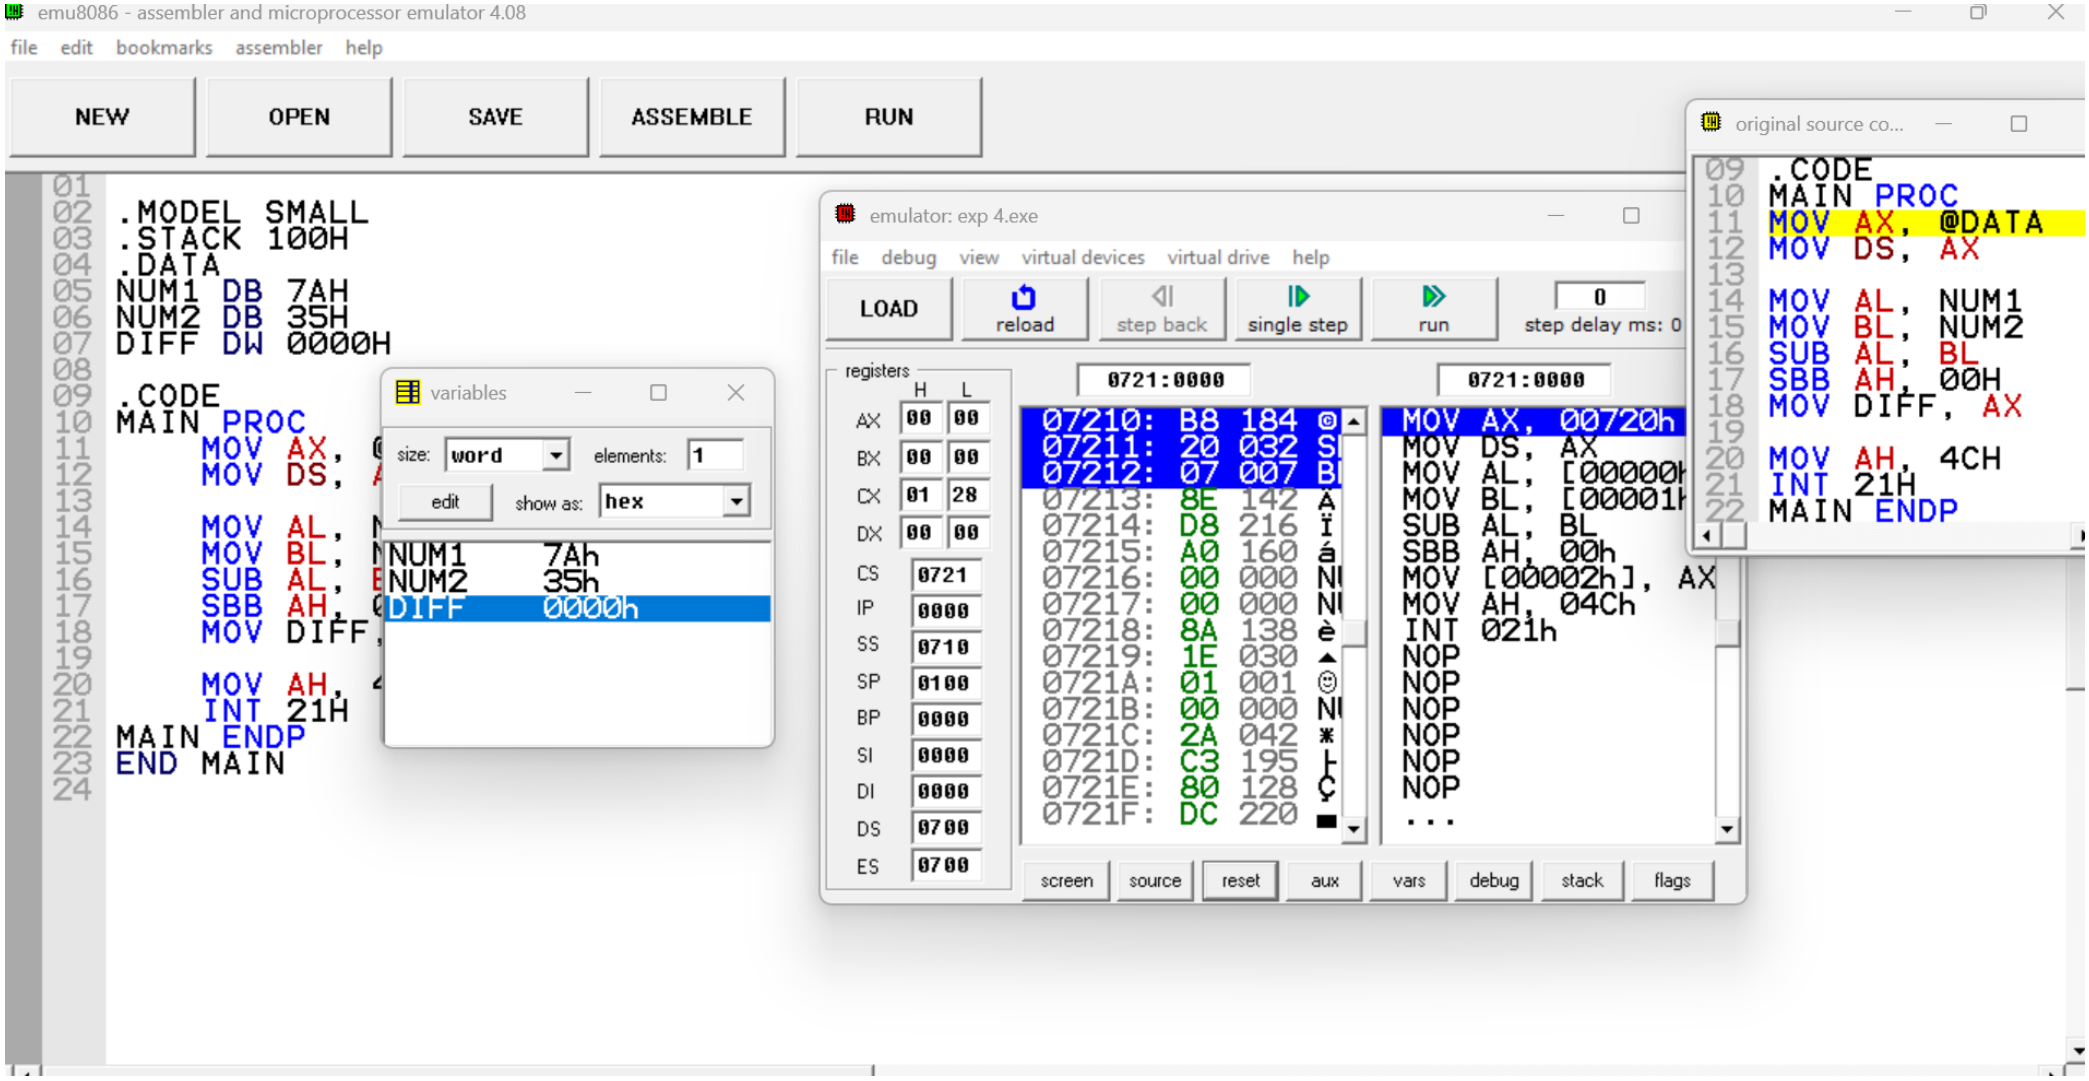

Aim: To develop and verify assembly language programs for 8-bit addition, 8-bit subtraction, 16-bit multiplication, and 16-bit division.

Experiment: 16-bit Division

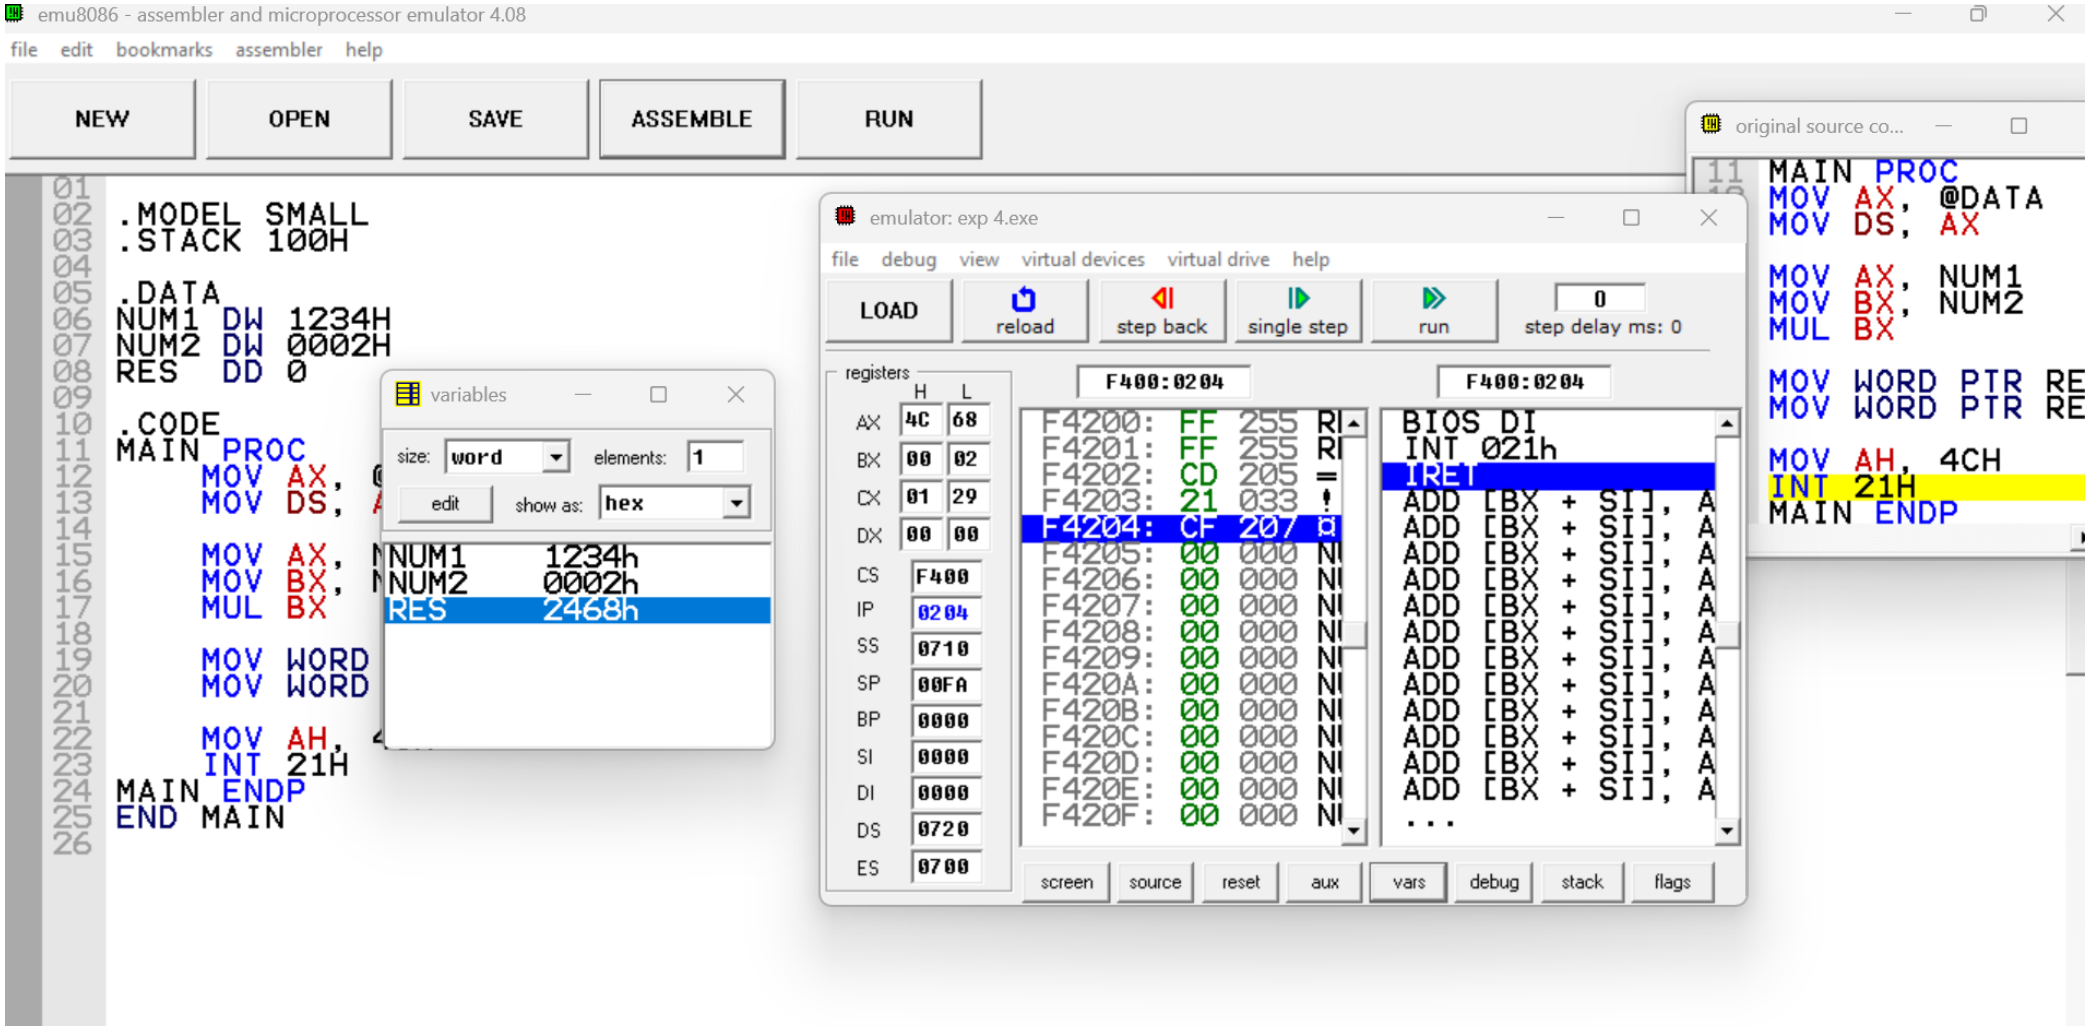

Expected verification: Quotient = 0123H, Remainder = 0004H for 1234H ÷ 0010H.

Experiment: 16-bit Multiplication

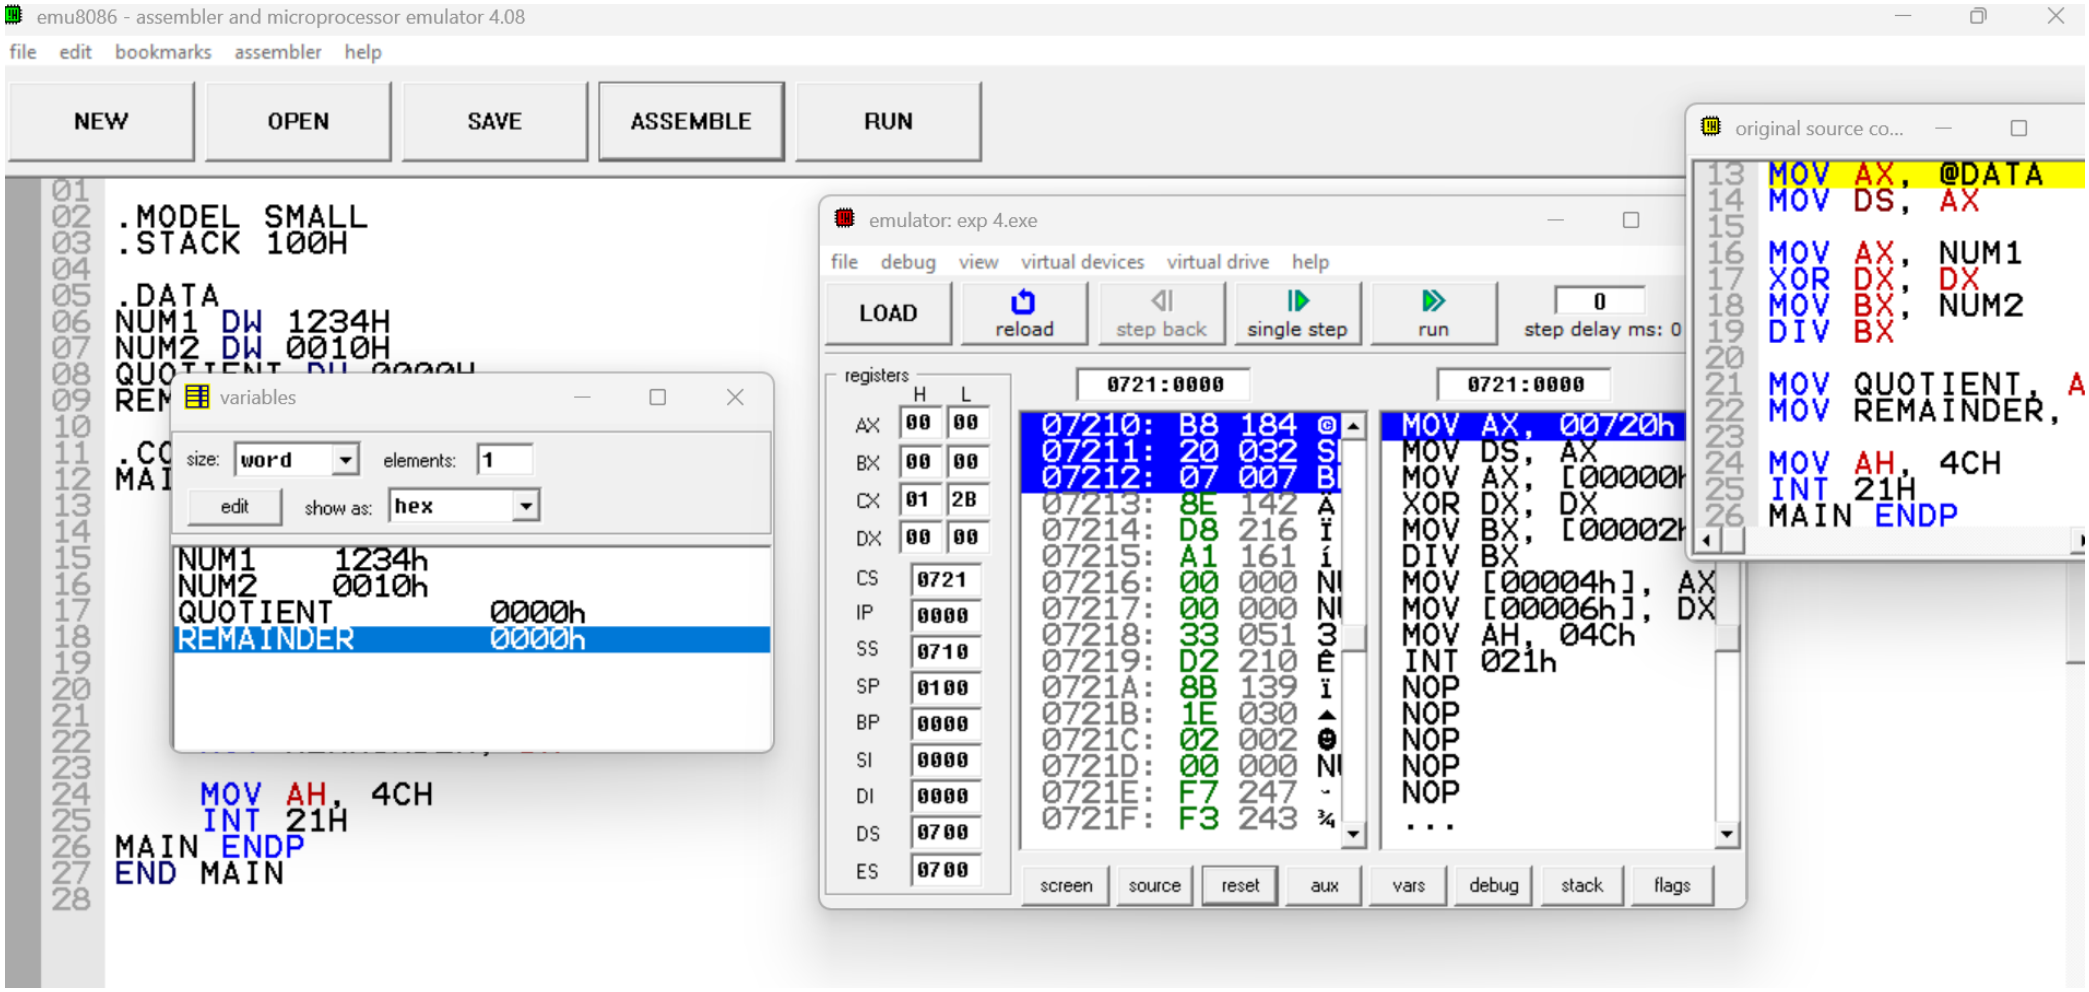

Expected verification: 1234H × 0002H = 00002468H.

Experiment: 8-bit Subtraction

Expected verification: 7AH – 35H = 45H.

Experiment: 8-bit Addition

Expected verification: 45H + 25H = 6AH.
